

Industrial Organization

Dr. Ryan Safner

IOs20.classes.ryansafner.com

Course: ECON 326 - Spring 2020

Room: Rosenstock Hall 101

Meets: TuTh 2:00–3:15PM

Email: safner@hood.edu

Office: Rosenstock Hall 118

Hours: TuTh 3:15–5:00PM

Industrial Organization is one of the most common fields of applied microeconomics. It traditionally studies business firms and their relationship to the market—how they make economic decisions, how they are affected by government regulation, how they strategically interact with one another—and how these change in markets that are more or less competitive—monopoly, oligopoly, monopolistic competition, or perfect competition, often with a close connection to antitrust law. Industrial organization is a direct extension of microeconomics, and as such, the **prerequisite** for this course is **ECON 206**.

This course will be a hybrid of formal lecture, hands-on activities/games, and readings-based class discussions, with exams and a writing assignment serving as the prime means of evaluation.

1 Course objectives

By the end of this course, you will:

- Understand key economic models of perfect competition, monopoly, monopolistic competition, oligopoly (Bertrand, Cournot, and Stackelberg competition), and contestable markets
- Apply models of competition to different industries and regulatory regimes
- Simulate strategic and game theoretic interactions and apply them to industry behavior
- Discuss how firms actually compete with one another
- Critique textbook models and theories of regulation and antitrust
- Understand the economic problems that firms solve, create, and grapple with
- Debate regulatory solutions to problems and current events in various industries

Given these objectives, this course fulfills two of the learning outcomes for [the George B. Delaplaine, Jr. School of Business](#) Economics B.A. program:

- Apply economic reasoning and models to understand and analyze problems of public policy [...]
- Demonstrate effective oral and written communications skills for personal and professional success[...]

My standard disclaimer: This class may challenge many of your existing beliefs and conceptions about how the world works, and how it should work. This is the most important and exciting part of a liberal arts education. This does *not* mean that I want to make you to see everything “my way.” In fact, if you come out of this class thinking exactly like me, then I have probably failed you as a teacher. To the best of my ability, I keep my opinions to myself unless relevant for purposes of discussion, and I respect and invite you to reach your own conclusions on all matters.

Content warning: this class will cover sensitive political and cultural topics and compel you to grapple with countries, cultures, and viewpoints very different from your own. To put it mildly, these topics may include themes of violence, slavery, imperialism, and different ideologies inherently wrapped up in the tragic history of both the developed and developing world.

If at any point you find yourself struggling in this course for any reason, please come see me. Do not suffer in silence! Coming to see me for help does not diminish my view of you, in fact I will hold you in *higher* regard for understanding your own needs and taking charge of your own learning. There are also some fantastic resources on campus, such as the [Center for Academic Achievement and Retention \(CAAR\)](#) and the [Beneficial-Hodson Library](#).

See my [tips for success in this course](#).

2 Course materials

You can find all course materials at my academic website dedicated for (all sections of) this course [IOS20.classes.ryansafner.com](https://ios20.classes.ryansafner.com).

My lecture slides will be shared with you, and serve as your primary resource, but our main “textbook” below is **recommended** as the next best resource and will be available from the campus bookstore.

2.1 Books

My lecture slides (made available to you) are the primary resource for the material and the best guide to prepare for assignments. However, there are some required readings, and some cases where you may want further reference for a concept.

The first half of the course (before the midterm) will be fairly “standard” I.O. course focusing on economic models. While there is no required textbook or readings, you might consider buying or reading one of the following (both of which I source some of my lecture materials to):

1. Church, Jeffrey and Roger Ware, 2000, [Industrial Organization: A Strategic Approach](#), New York: McGraw-Hill, ISBN: 0-256-20571-X
2. Carlton, Dennis W and Jeffrey M. Perloff, 2005, [Modern Industrial Organization](#), 4th Edition, USA: Pearson, ISBN: 978-0321180230

Some of our required readings will come from

3. Thiel, Peter, 2014, *Zero to One: Notes on Startups, Or How to Build the Future*. New York: Crown Business, ISBN: 978-0-8041-3929-8
4. Posner, Eric A, and E Glen Weyl, 2019, *Radical Markets: Uprooting Capitalism and Democracy for a Just Society*, Princeton, NJ: Princeton University Press, ISBN: 978-0691196060

3 Assignments and grades

You can find descriptions for all the assignments on the [assignments page](#).

	Assignment	Percent
n	Participation (Average)	20%
n	Homework (Average)	10%
1	Position Paper	25%
1	Midterm	20%
1	Final (Take-home)	25%

All grades are based on the following traditional scale:

Grade	Range	Grade1	Range1
A	93–100%	C	73–76%
A–	90–92%	C–	70–72%
B+	87–89%	D+	67–69%
B	83–86%	D	63–66%
B–	80–82%	D–	60–62%
C+	77–79%	F	< 60%

These grades are firm cutoffs, but I do of course round upwards (≥ 0.5) for final grades. A necessary reminder, as an academic, I am not in the business of *giving* out grades, I merely report the grade that you *earn*. I will not alter your grade unless you provide a reasonable argument that I am in error (which does happen from time to time).

4 Policies and Expectations

This syllabus is a contract between you, the student, and me, your instructor. It has been carefully and deliberately thought out¹, and I will uphold my end of the agreement and expect you to uphold yours.

In the language of game theory, this syllabus is my commitment device. I am a very understanding person, and I know that exceptions to rules often need to be made for students. However, to be *fair* to *all* students the syllabus artificially constrains my ability to make exceptions at a whim for anyone. This prevents clever students from exploiting my congenial personality at everyone else's expense. Please read and familiarize yourself with the course policies and expectations of you. Chances are, if you have a question, it is answered herein.

4.0.1 Attendance and Participation

I expect you to attend class and to come having already done the reading assigned for that day. I will remind you in class and possibly through Blackboard or email which readings I want you to read for the next class. You are all adults and I will treat you as such. I do not take attendance, nor do I grade formally for participation but I strongly recommended you attend class and participate for your sake and the sake of your classmates. If you are too distracted or are not prepared to learn, I suggest you stay home, where you can check Facebook more efficiently. I reserve the right to boost the final grades of students that I believe have made consistent, quality contributions above and beyond their peers in class conversations by up to 2.5 points.

4.0.2 Devices

You are allowed to have and use laptops and tablets in the classroom. I will not stop you, but I strongly discourage you from using these to take notes (see Tips for Success). As a courtesy to myself and to others, do not use your phone in class. I reserve the right to embarrass you in front of everyone if you do so.

4.0.3 Absences and Make-Ups

You generally do *not* need to let me know if you are unable to make class, *unless* it is on the day of an exam. It will however, be your responsibility to acquire the notes from a classmate for any missed classes. If you are unable to attend an exam for a legitimate reason (e.g. sports/club events, traveling, illness, family issues), please notify me at least *one week* in advance, and we will schedule a make-up exam date. If you are ill or otherwise unable to attend on the day of the exam, contact me ASAP to make arrangements. Failure to do so, including desperate attempts to make arrangements only *after* the absence will result in a grade of 0 and little sympathy. I reserve the right to re-weight other assignments for students who I believe are legitimately unable to complete a particular assignment.

4.0.4 Late Assignments

I will accept late assignments, but will subtract a specified amount of points as a penalty. See individual assignment descriptions for the amount of points taken off (as it varies by assignment). If an answer key is posted before you turn in your assignment, the maximum grade you can earn is an 80. Even if it is the last week of the semester, I encourage you to turn in late work: some points are better than no points!

4.0.5 Grading

I will try my best to post grades on Blackboard's Grading Center and return graded assignments to you within about one week of you turning them in. There will be exceptions. Where applicable, I will post answer keys once I know most homeworks are turned in (see Late Assignments above for penalties).

¹A syllabus can and will be used as a legal document for disputes tried at a court of law. Ask me how I know.

Blackboard's Grading Center is the place to look for your most up-to-date grades. You will also be given an Excel spreadsheet template where you can calculate your overall grade and forecast "what if" scenarios.

4.0.6 Email Accounts

Students must regularly monitor their Hood email accounts to receive important college information, including messages related to this class. Email through the Blackboard system is my main method of communicating announcements and deadlines regarding your assignments. **Please do not reply to any automated Blackboard emails - I may not receive it!** My Hood email (safner@hood.edu) is the best means of contacting me. I will do my best to respond within 24 hours. If I do not reply within 48 hours, do not take it personally, and *feel free to send a follow up email* in the very likely event that I genuinely did not see your original message.

4.0.7 Office Hours

I am generally in my office Monday-Thursday during "normal business hours." You are always welcome to walk-in and chat about class, college, careers, or anything at all. Please do try to use the official office hours stated at the head of the syllabus if possible. If you need to meet at a different time, I request that you send me an email or let me know after class so I know when to expect you. If you want to go over material from class, please have *specific* questions you want help with. I am not in the business of giving private lectures (particularly if you missed class without a valid excuse).

Watch the excellent and accurate video explaining office hours (on website syllabus page):

4.0.8 Enrollment

Students are responsible for verifying their enrollment in this class. The last day to add or drop this class with no penalty is **Thursday, January 23**. Be aware of [important dates](#).

4.0.9 Honor Code

Hood College has an Academic Honor Code which requires all members of this community to maintain the highest standards of academic honesty and integrity. Cheating, plagiarism, lying, and stealing are all prohibited. All violations of the Honor Code are taken seriously, will be reported to appropriate authority, and may result in severe penalties, including expulsion from the college. See [here](#) for more detailed information.

4.0.10 Van Halen and M&Ms

When you have completed reading the syllabus, email me a picture of the band Van Halen and a picture of a bowl of M&Ms. If you do this *before* the date of the first exam, you will get bonus points on the exam.² Yes, this is real.

4.0.11 Accessibility, Equity, and Accommodations

College courses can, and should, be challenging and bring you out of your comfort zone in a safe and equitable environment. If, however, you feel at any point in the semester that certain assignments or aspects of the course will be disproportionately uncomfortable or burdensome for you due to any factor beyond your control, please come see me or email me. I am a very understanding person and am happy to work out a solution together. I reserve the right to modify and reweight assignments at my sole discretion for students that I believe would legitimately be at a disadvantage, through no fault of their own, to complete them as described.

²If 75-100% of the class does this, you each get 2 points. If 50-75% of the class does this, you each get 4 points. If 25-50% of the class does this, you each get 6 points. If 0-25% of the class does this, you each get 8 points.

If you are unable to afford required textbooks or other resources for any reason, come see me and we can find a solution that works for you.

This course is intended to be accessible for all students, including those with mental, physical, or cognitive disabilities, illness, injuries, impairments, or any other condition that tends to negatively affect one's equal access to education. If at any point in the term, you find yourself not able to fully access the space, content, and experience of this course, you are welcome to contact me to discuss your specific needs. I also encourage you to contact the [Office of Accessibility Services](#) (301-696-3421). If you have a diagnosis or history of accommodations in high school or previous postsecondary institutions, Accessibility Services can help you document your needs and create an accommodation plan. By making a plan through Accessibility Services, you can ensure appropriate accommodations without disclosing your condition or diagnosis to course instructors.

5 Schedule

You can find a full schedule with resources for each class meeting on the [course website schedule page](#).
